Objective

Motivated software Engineering graduate seeking to apply my skills in a junior software engineering role at your company. Passionate about writing clean, efficient, and accessible code. Eager to bring my problem-solving skills to a team where I can contribute to developing user-friendly software solutions.

Education

Software Engineering-Moringa school

Ingressive for Good/CISCO- Cybersecurity

Ajira Digital-Digital Marketing

SoftwareTesting-Great Learning

Technical Writing-Google technical writing course

Skills

- Programming Languages: Ruby, Ruby on Rails
- Web Development: HTML, CSS, JavaScript
- Databases: MySQL, postgresql
- Tools: Git, vite, Tailwind CSS
- Excellent problem-solving abilities
- Strong written and verbal communication skills

Projects

LOCALSHOP

- Developed a web-based shop management system using React and Ruby on Rails

Created an inventory app that can help in stock taking, generation and visualization of weekly, monthly and annual reports.

BookPulse-

is a comprehensive book viewing and trading application that provides users with an easy-to-use platform for exploring and managing their book interests. It allows users to view a wide array of books, manage their viewed books, upload their own books, and engage in secure transactions for purchasing books.

Vitamu-personal project

Vitamu is a food ordering application with dynamic menu options. It is visually appealing and offers a mapping and filtering option. I used React and Tailwind CSS.
